

6 STEPS TO PROTECT YOUR CHILD FROM THE ANTI-PARENT AGENDA

#1 - Be in the know

Familiarize yourself with the GCVC Toolkit for SBHCs, including reasons why you should be concerned.

#2 - Check paperwork

Check your child's back-to-school paperwork carefully, looking for any form asking you to give consent for your child to be treated medically at school.

#3 - Don't be afraid to ask

Ask your school nurse or an administrator if your child's school operates a School-Based Health Center or if there are any licensed professionals treating children at school aside from the school nurse.

#4 - Parents have rights

Tell your school you want to be notified before any non-school employee has access to your child in any capacity, making it clear that you do not consent for your child to be assessed or treated by anyone not employed by the school.

#5 - Teach your children

Tell your child to let you know if anyone attempts to assess them or provide treatment, and advise them to refuse to participate in any surveys, discussions with, or visits by anyone who is not their teacher or the school nurse.

YOUR VOICE MATTERS

Tell your legislators you don't want school health centers prescribing drugs without your consent.
